Setting

This game is set after an event called the Collapse, wherein a prosperous, highly advanced global civilization was destroyed by tremendous creatures, called Titans, emerging from Mana Gateways that they were using to power their cities. The destabilization wrought by the Collapse to the world dried up the seas and turned the land arid. Now water and vegetation is mostly found clustered around Mana Gates, where the creatures most twisted by the Mana also roam. Mana is akin to radiation, in that it suffuses an area invisibly and causes mutations, but Mana mutations are quick and dramatic. Mana also disrupts electric currents, rendering conventional technology inoperable. Mana density increases in proximity to a Gate or Titan. Due to the danger inherent in living in these areas of dense Mana, most of civilization is found in the dry lands away from the Gates. A few years ago, within living memory, a prophesied being called the Titanslayer managed to actually fell one (1) Titan. Now those who delve into the depths of the Mana-saturated areas dream of accruing enough power (through beneficial mutations, wealth, advanced mana-tech, training and whatever means necessary) to fell a second Titan and claim the title of . . .

Titanslayer

Optional lore expansion (can be excised for page-count/conciseness):

One of the most ardent sponsors of would-be Titanslayers is the University of Human Understanding and their world-spanning project to catalogue and categorize *everything*, the Understanding. In most cities and towns, there will be an agent of the Understanding willing to provide payment for bits of knowledge and physical specimens.

TODO: Expand lore expansion to add a few more factions (Og, Kaleina, those idiots who claimed the first titanslayer, define what Hunters are)

Core rules

Action Rolls

Titanslayer is primarily played through roleplay, but if players want to do a risky action or avoid danger the *Game Master* (GM) will usually ask them to make an *Action Roll*. The GM secretly decides on a *Difficulty Class* of the roll and tells the player which two *Attribute Dice* they should roll. The player then rolls two dice, corresponding to the attributes they were told to roll and add the numbers together. If they roll equal to or higher than the DC, they succeed.

Example:

Player A wants to climb a slick cliff face.

- GM sets a DC of 10 and tells Player A to roll Might and Agility, as they fit climbing well.
- Player A references their character sheet, which says they have a d8 Might and d6 Agility, and consequently rolls these two dice.
- They roll a 3 and a 3, totalling 6.
- This would normally mean they fail the roll, preferably in an interesting way, such as:
 - A rock tumbles loudly, alerting a dangerous beast of their presence
 - They fall and take a point of damage
 - The cliff begins to move? Uh-oh.

However, in Titanslayer rolling the same number on both dice is actually a *Critical Roll*, so not all hope is lost!

Critical Rolls

When you roll the same number on both *Attribute Dice* for an *Action Roll* it causes a *Critical Roll*. When a *Critical Roll* happens, you roll the highest *Attribute Die* of the roll again, and add it to the total.

Continuing our example from earlier:

- Player A rolled 3 on both dice for a crit!
- Their highest die was their Might, a d8, so they add another d8 to the roll.
- This time they roll a 4, making their total $3+3+4 = 10$, which means they succeed the check.

Boons & Banes

Certain advantageous or disadvantageous situations can give a roll *Boons* or *Banes*. Which are stacking conditions that give an extra die starting at a d4, increasing in size per stack, that is added or subtracted to rolls, respectively.

Boon(N) denotes N stacks of Boon. E.g. Boon(2) means add a d6 to the roll.

Stacks of *Boons* and *Banes* cancel each other out, so Boon(3) and Bane(2) would result in Boon(1), meaning you'd add a d4 to the roll.

Stacks	1	2	3	4	5	6
Die	d4	d6	d8	d10	d12	d20

Additional Successes

You succeed by meeting or beating the DC of an *Action Roll*, and you gain an additional *Success* for each 5 you roll above the DC.

The benefit of a *Success* varies depending on the Action you were doing. Maybe you find more of the herbs you were searching for? Or you hid at just the right time to overhear a secretive conversation?

Some rolls don't follow the rule that each 5 above the DC gives a *Success*. Attack Rolls for example instead target an opponent's *Damage Thresholds*, giving +1 *Success* for each threshold you hit (and then for each +5 after the last threshold).

Successes gained when Attacking usually grant +1 damage to the Attack, but some unique abilities might give different effects. You might for example encounter an electrified shark-jellyfish hybrid that stuns its prey — attacking with a shock that reduces your *Action Point* regeneration by 1 for each *Success*, instead of dealing damage directly.

Tag Team Rolls

Once per *Shift* per character, players may initiate a *Tag Team Roll*.

To initiate a *Tag Team Roll*, each participant spends 1 Focus in addition to what other resources they would normally spend and makes their respective rolls to construct a pool of die results. To resolve the roll, the players choose 2 dice from the constructed pool, which becomes the result of the roll.

The roll counts as an *Action Roll*, and any features or modifications that would activate from a roll do so as normal. If multiple characters would trigger the same effect, only one resolves.

The GM can at any point initiate a *Tag Team Roll* for the party, with no cost to the characters.

Tag Team Rolls. can be initiated during combat, given that all participants act during the same *Phase*.

Character creation

Everyone needs a character in order to play. A character in Titanslayer consists of their *Attributes*, determining what dice they roll for checks; their *Background*, defining the character's life until they became a *Hunter*; their *Heritage*, which describes their lineage and inherent *Mutations*; and their *Equipment*, which they discover, craft, and purchase on their journey.

All characters start with some base stats, most of which are modified by their *Attributes*:

Max *Grit*: 7

Max *Focus*: 7

Carrying Capacity: 4

Base *Speed*: 3 Spaces

Grit is a measure of the physical and mental strain a character can withstand, acting similar to HP in other games.

Focus is a measure of your awareness of your surroundings and the state of yourself, and is spent to use certain *Abilities* and *Actions*.

Carrying Capacity is a measure of how much *Bulk* you can carry, and is discussed further in the Equipment section.

Speed defines how many *Spaces* you can move using a single *Move*.

Attributes

Each character has 4 *Attributes* that are represented by a die of size d4-d12, mapping to a modifier of 1-5.

On creation, arrange [d4, d6, d6, d8] how you want your character's attributes to be.

Heritages

Heritage define the lineage of your character, and comes with *Mutations* that your character starts with.

Backgrounds

Backgrounds describe what your character has been doing before venturing into the wilds as a *Hunter*. Each *Background* can be invoked for non-combat rolls to gain *Boon*(1) on the roll, given it makes sense for it to help in the narrative. Furthermore, you gain a single tier 1 *Ability* of the *Attribute* denoted by your *Background*.

Mutations

Choose any *Mutations* you'd like from the Mutation Table ([document](#)), or make up your own, then notify the GM of your choices. The first 2 tiers worth of *Mutations*, are free. For each tier past the first 2, one of your *Focus* is permanently *Corrupted* for each tier of the chosen *Mutations*.

Archetypes

If you're not sure where to start in terms of attributes, weapons, armor, and equipment, here are some options.

If you want to play a character who can move quickly around the battlefield and attack at range, Agility and Insight are good choices for your highest Attribute scores. Take 2 Kunai/Daggers (your choice), a Longbow, a quiver, and either a bandolier with 3 more Kunai/Daggers or Light Armor.

If you want your character to be able to withstand a lot of attacks, you should focus on Might and Insight. Take a Warhammer, Heavy Shield, Boomerang, and Heavy Armor. You may want an extra Boomerang or two. It's important to have a repair kit since this build is intended to block damage using the durability of your armor and shield.

Alternatively, you can focus on dealing damage in melee, in which case Might and Presence are

Attribute Table

Attribute	Description	Effect
<i>Might</i>	Strength and endurance	+ mod to <i>Grit</i> and <i>Carrying Capacity</i>
<i>Agility</i>	Speed, dexterity, flexibility and balance	+ mod to <i>Speed</i>
<i>Insight</i>	Ability to discover and reason about information	Boon dice can never roll lower than your Insight mod
<i>Presence</i>	Inner focus and the power to inspire or command	+ mod to <i>Focus</i>

important Attributes. Choose a Greatsword, Sling, and Medium Armor.

The absolute necessities are a backpack containing a bedroll and 8 Rations. Feel free to get any other items you want and have space for, but consider leaving some room for other items you pick up along the way. It's a good idea to make sure at least one person in your party has a mess kit, rope, repair kit (the more the better), and torches. See the Equipment section section for more details.

Character Progression

Characters in Titanslayer can grow in a multitude of ways. *Abilities* can be gained both during and outside exploration, while *Attribute* increases and *Mutations* are primarily gained out in the field.

In the end, you'll likely have to brave the corrupted wilds if you want your character to grow, as both *Experience Points* and *Scrap* in large are gained through taking down valuable prey and uncovering long lost secrets.

Experience Points

You gain *Experience Points* (XP) through a number of triggers that can each count once per in-game day:

- Defeat a strong foe
- Solve a puzzle
- Explore a hidden area
- Complete a quest
- Resolve a conflict nonviolently
- Act in line with your character traits

When you reach certain XP thresholds, you're able to raise one of your *Attributes* by 1, and freely gain 1 *Ability* you qualify for. The amount of XP needed scales with the total of your *Attribute Modifiers*, and equals $2^{\text{mod total}-4}$.

Attribute Mod total	XP threshold
8	16
9	32
10	64
11	128
12	256

Scrap

In a world where trade is the favored form of transaction, *Scrap* is an abstraction of the buying power of the items and information you collect. It is primarily gained through selling items and information you encounter in the wilds, and completing *Quests*.

Scrap can be used to buy Equipment, crafting materials, vehicles, and so on. In addition, it can be spent to perform an activity, such as hiring someone who can teach you a new *Ability* or help you craft an item.

Mutations

When wandering into the mana-infested wilds, it's not uncommon for you to return different from how you were when you departed. Exposure to high levels of *Mana Saturation* can cause your body to *Mutate*, granting potentially greanting you *Abilities* you didn't have access to before at the cost of your humanity.

Whenever you use *Saturated* or *Corrupted Focus* to power an *Ability* you must roll a *Saturation Check* to see if you *Mutate*. The DC for this check is equal to $8 + 2 * \text{Saturation Level}$, based on the *Saturation Level* of the hex you're in.

If you succeed the check you clear the *Saturation* from the *Focus* and gain *Boon(N)* for the *Action*, where N is equal to the amount of *Saturation* cleared this way. If you fail the check, you instead *Mutate*.

When you *Mutate*, you roll on the Mutation Table to determine what *Mutation* you get. Unless otherwise specified, you may choose where on your body the *Mutation* apparates, and what it looks like.

After *Mutating* you permanently *Corrupted* an amount of *Focus* equal to the tier of the *Mutation*, then clear any *Saturated Focus*. If all your *Focus* is *Corrupted* after mutating, you immediately turn into an *Aberrant* and lose control of your character.

Abilities

Combat

Initiative and action economy

Each round of combat happens in two *Phases* following the Tortoise & Hare style of initiative. Players use *Action Points* (AP) to perform various actions and can choose to start each turn *Rushed* (2 AP, acts during first phase) or *Methodical* (3 AP, acts during second phase). Action points are regenerated at the start of the chosen phase.

Actions

If nothing else is specified, an Action costs 1 AP to use. Actions (and Free Actions) are subject to the *Repeated Action Penalty* (RAP), which means every subsequent use of the same Action in your Phase costs 1 additional AP.

If an *Ability* doesn't specify an Action to use, it doesn't stack RAP.

Attack with a *Weapon* or *Cast* a *Spell*

Help an ally with their next Action Roll (except *Help*), given that you can meaningfully impact it in the narrative, granting them a *Boon*(1 + 1 per *Success*).

Brawl with a target, making a *Might Insight Roll* choosing either *Grapple* or *Shove*

- *Grapple* a target, inflicting *Grappled* and granting *Boon*(*Success*) to the first Attack against the target. Targets Evasion.
- *Shove* a target 1 Space + 1 per *Success*. 2 Spaces of Shove can be traded to knock the target Prone. Targets Evasion.

Ready an Action, paying its AP cost immediately.

Interact with or *Use* an item, or *Parley* with a target.

0 AP Actions

Move up to your Speed.

Disengage from a single enemy, preventing your own movement from triggering Retaliations from them this phase.

Stow/Draw the Weapons or objects held in your

hands to/from your *Quick Draw Inventory*. You can both Stow and Draw with a single activation of this Action. +1 AP to Stow/Draw to/from Inventory.

Static Actions

Static Actions are *Actions* you can take on your turn that are not affected by RAP.

0 AP: *Charge* your next Action, delaying its activation until the end of the next Phase, but granting you *Boon*(3) on it. You must pick a target Space for the Action when picking this option.

0 AP: *Push* yourself, spending *Grit* in order to perform one of the following effects:

- (repeatable +1 cost) 1 Grit for *Boon*(1)
- 2 Grit to gain 1 AP

Reactions

Characters can take *Reactions* outside of their own Phase, usually at the cost of *Focus*. Each *Reaction* has a specific trigger that let characters use it. One *Action* can only *Trigger* one *Reaction*. A character can perform at most 1 *Reaction* in response to any particular *Action*.

Attacks and defense

An attack is normally rolled by using two *Attribute Dice* relevant to the weapon used, as well as any other relevant bonuses. All weapons have a base damage of 1. Unarmed attacks have a base damage of 0. Damage is dealt to your *Grit*.

Melee weapons usually have a *Threat* of 1, meaning that you can attack things within 1 space of yourself. If you have a free hand, you can make unarmed attacks with *Threat* 1.

There are three *Damage Thresholds* that determine the damage dealt; *Evasion*, *Heavy Hit* and *Brutal Hit*. Different characters have different thresholds based on their stats as described in the **Armor & Damage Thresholds Table**.

Name	Cost	Trigger*	Effect
Opportunity Attack	1 Focus	When target moves carelessly from a Space in your <i>Threat</i>	Take a Basic Attack** action.
Activate Readied Action	-	Custom	Custom
Protect	1 Focus	When an adjacent target is hit by an attack	The attack roll counts for both of you, but the damage taken is halved.

A roll higher than a creature's *Evasion* is a hit. Rolling above the Heavy and Brutal hit thresholds each add +1 *Success* and may trigger additional abilities. Every +5 above Brutal hit counts as a +1 success. Normally each *Success* means +1 *Damage*, unless replaced with other abilities. Certain actions such as *Grapple* ignore *Heavy* and *Brutal* thresholds and target *Evasion* directly, therefore using the standard +5 rule.

You can *Block Damage* with armor and weapons with the Durable tag. This requires no reaction, and when blocking the equipment takes the full *Damage* to its *Durability*, including any excess damage. If the equipment's *Durability* reaches 0, it's considered *Broken*.

If Armor is *Broken* your *Evasion* and *Speed* remain the same, but your Heavy and Brutal Hit thresholds are calculated as if you have no armor.

Certain effects grant *Guard*, which grants temporary *Grit* that are instead reduced when you take damage. Separate effects granting *Guard* do not stack.

Retaliations

If you take 0 Damage from an Attack, whether by Evading, Blocking, or other means, or if you have *Guard* remaining after it, you may Retaliate. Retaliation effects happen automatically with no roll needed.

Below is a list of standard Retaliations, but certain Weapons, Mutations, and Feats can unlock more options.

Retaliation Enhancements

When Retaliating your options are enhanced based on what Weapons you currently wield. Only one enhancement can be used at a time.

Melee Light Weapons: When you Counter you may Step at half range

Melee Medium Weapons: When you Counter you leave an open wound on the target. If they move before the end of the current phase, they take 1 damage.

Melee Heavy Weapons: When you Counter you may Push the Attacker MIG mod / Size difference Spaces.

Ranged Weapons:

Wounds & Dying

At 0 *Grit* you gain a *Wound* and roll 1d8. If the result is under the number of *Wounds* they have, they die. Otherwise, they regain *Grit* equal to the result and lose 1 AP next round for each point of damage exceeding 0 *Grit*.

	Prerequisite	Effect
Step		Step 1 + AGI mod Spaces without provoking opportunity attacks
Guard		Gain 1 <i>Guard</i> until the start of your next acting <i>Phase</i>
Counter	Targeted by attack within <i>Threat</i> range	Deal 1 damage to the Attacker
Parry	Targeted by attack within <i>Threat</i> range while wielding a shield	You parry the attack, leaving the Attacker open. The first <i>Action Roll</i> against them before the end of the next Phase has <i>Boon(1)</i> . Perfect Parry: If the shield's Active is what made this Retaliation possible, the effect increases to <i>Boon(3)</i> .

Equipment

Each character has a *Carrying Capacity* equal to 4 + Might Mod. Items and *Equipment* have an amount of *Bulk* (usually 1). If you're carrying more than your *Capacity* at the end of a *Shift*, you lose *Grit* equal to the amount of extra *Bulk* you're carrying (total *Bulk* - *Carrying Capacity*).

Each character also has a *Quick Draw Inventory* with a Capacity of 3, which does not contribute to the total *Bulk* in your regular Inventory. Essentially, you get 3 extra Capacity for things like Weapons and Shields that you would want easy access to during combat.

Finally, small Items with 0 *Bulk* are called *Trinkets*, and don't go in a character's normal Inventory. Instead, each character has a *Pocket*, where they can fit as many *Trinkets* as they can physically write in

the box on their character sheet. These are things like a flint and steel, a pocket knife, a letter, or a sentimental item.

Weapons

A character has one main-hand and one off-hand. You can only hold as many items as you have hands, and some weapons have specific requirements to be used effectively. For example, you can use a Light weapon like a dagger with either hand, but a rapier requires more finesse, so you need to wield it in your main-hand.

Shields count as weapons and can be used to attack, but doing so is less effective than using a regular weapon. Their main purpose is to help you take less damage and absorb blows.

Equipment List

Item	Bulk	Description
Armor (worn/not worn)	1+/2+	Each tier above Light adds +1 <i>Bulk</i>
Weapon	1	
Heavy Weapon	2	
Bandolier	1	Can hold up to 3 Weapons with both the Light and Thrown tags (which then do not count towards total Bulk), counting as <i>Quick Draw Inventory</i> for the sake of the <i>Stow/Draw</i> Action.
Quiver	1	Comes with 20 Arrows, which it can hold
Ration x4	1	Food and water
Repair Kit	1	Needed for Crafting Checks and Tinker Checks to repair items
Backpack	1	Can carry 3 Bulk, max one in use
Mess kit	1	Needed for cooking
Bedroll	1	Sleeping without doesn't recover <i>Wounds</i>
Rope (15 meters)	1	
Torches x4	1	Burns for 1 <i>Shift</i> , providing Light in a 10 meter radius sphere

Armor & Damage Thresholds

	<i>Evasion</i> + Agility Mod + Insight Mod	<i>Heavy Hit</i> + Might Mod + Presence Mod	<i>Brutal Hit*</i> + Might Mod + Presence Mod	Max Grit	Speed
No armor	2	6	11	0	+1
Light armor	3	7	12	2	
Medium armor	2	8	13	4	
Heavy armor	1	10	15	6	-1

*Beyond Brutal: Every 5 above Brutal counts as +1 damage/success

You can see a full list of weapons and their tags in **Appendix A**.

Exploration

Mana Zones

Most of your time in this game will be spent adventuring in the mana-filled wild wastes of *Makkeo*.

The main brunt of interesting locations to explore that haven't already been picked clean by previous explorers are *Mana Zones*. *Mana Gates* create large fields of dense Mana that allow water to be retained by the ecosystem and cause drastic mutations in all life. *Mana Zones* are several days of travel across and fraught with danger, but also opportunity.

At the start of each *Shift* spent inside of a *Mana Zone*, the GM will make an *Encounter Check*, which may have both positive and negative effects for the party.

Shifts

A day is divided into 6 *Shift*, with one activity in Exploration mode usually taking one *Shift*.

Explorers need rest. If a day's worth of *Shift* has passed since the party last used the Rest Activity, they will lose 2 *Grit* at the end of each *Shift*. Similarly, at the end of each day, if a character has not consumed a ration, they lose 2 *Grit* for each day gone without food.

Exploration Activities

The players must choose a "Party Caller" that informs the GM what actions the party will take when exploring. Each day spent exploring is divided into six *Shifts*. Usually, one 'exploration activity' takes one *Shift* to perform. The party can as a group decide to push themselves, each losing 2 *Grit* to perform an additional *Exploration Activity*.

The exploration is acted out by charting a path through a hexgrid map. Progress is driven by the players deciding what they would like to do among these actions:

- *Travel*
 - The party attempts to traverse a hex tile. This will take up two shifts if they are successful, but vehicles may shorten this time. When traversing terrain that is difficult to navigate, the navigator will make a check (Insight + Presence) to determine if the party can stay on course.
- *Search*

- The party explores the hex tile they are currently in to look for interesting locations. Each member rolls a Search check (Insight + Insight). If enough cumulative successes are rolled, the party finds a location. This check is made easier if the players have a vague idea of where it is.
- *Hunt*
 - The participating characters all roll a hunting (Agility + Presence) check, and success depends on both the danger of the prey they are hunting and the type of terrain. If the amount of successes rolled is above the DC, the party locates the creature they are hunting. If the result is lower than the DC, but higher than the size of the hunting party, you encounter a random creature. If the amount of successes is lower than the size of the hunting party, they are ambushed by their prey.
- *Forage*
 - All participating characters roll forage (Intelligence + Intelligence) checks, and the DC depends on how bountiful the targeted area is.
- *Rest*
 - The party settle down to take a rest. Each player receives 2 Rest Points they can use to take the following actions:
 - 2 RP - *Sleep* (once per day): Clear 1 *Wound*, then gain the bonuses of *Relax* and *Refocus*
 - 1 RP - *Relax*: Regain half of your *Grit*.
 - 1 RP - *Refocus*: Recover half of your expended focus.
 - 1 RP - *Keep Watch*: Roll a single Insight die. If the result is higher than the GMs encounter die, receive advance warning of threats to the party.
 - 1 RP - *Repair Item*: (repeatable, requires a Repair Kit): Choose an item and roll a repair check (Might + Insight). The item clears 1 + Successes Durability.

Encounter Checks

To make an *Encounter Check* the GM rolls 2d8, with a 1 on either die meaning the Party will stumble upon the hex's Location, and an 8 on either die meaning an Encounter happens. To determine the exact Encounter or Location, the GM consults the hex's roll tables.

If the *Encounter Check* crits (same number on both dice), the following happens:

- A *Mana Surge* of intensity equal to the dice value occurs
- The GM rolls the *Encounter Check* again, adding whatever effects it causes to the result

Mana Surge

Sometimes the air in *Mana Zones* grows thick and tremble, as a wave of concentrated Mana spills from the environment. These are mostly caused by *Encounter Checks*, but can also occur from events such as entering areas of concentrated Mana or battling a *Titan*.

When a *Mana Surge* occurs, the following happens:

- All players must make a Saturation Roll (*Might + Presence*) against a DC of 7 + the Intensity of the surge, or *Saturate* 1 + 1 per 5 they failed by *Focus*.
- The GM gains an number of *Environment Tokens* equal to the Intensity of the surge.

Appendices

Appendix A: Weapons

Weapons

Name	Roll	Active* (1 Focus)	Tags
Dagger	Agility + Insight	Dirty Fighting: Your next Attack slices an exposed tendon or muscle on hit, either halving the target's Speed until the end of the round or giving it Bane(1) on its next Attack.	Light Thrown(5)
Greathammer	Might + Might		Heavy Two-handed Unwieldy(1) Sharp(1)
Greatsword	Might + Might		Heavy Two-handed Unwieldy(1) Sharp(1)
Halberd	Might + Agility	Whirlwind: Your next Attack hits all Spaces within half of Reach, using the same Attack Roll for each target.	Two-handed Reach(2)
Kunai	Agility + Insight	Swift Strike: When you take the Move action, you may make an Attack with a Light weapon.	Light Thrown(5)
Rapier	Agility + Presence	Fencer: Step 1 Space without provoking Opportunity Attacks before or after making the Attack Roll. If you move directly towards the target, gain Boon(1) on the Attack Roll. If you move away from the target, prepare to counter, allowing you to Retaliate the next time someone moves into your Threat.	One-handed
Stiletto	Agility + Insight	Infiltrate: Your next Attack uses the target's Evasion as baseline when determining the thresholds for Heavy+ Hits, defaulting to the 5+ rule.	Light
Spear	Might + Agility	Piercing Thrust: Your next Attack pierces all enemies in a line, using the same Attack Roll for each target.	Versatile Reach(2) Thrown(5)
Sword	Might + Agility	Lunge/Parry: Lunge: You gain Reach(2) for this Attack. Parry: You gain Guard(1)	Versatile
Warhammer	Might + Insight	Can Opener: You may choose to attack the target's armor directly, without giving the target an opportunity to Retaliate.	Versatile Crush(1)

Name	Roll	Active* (1 Focus)	Tags
Whip	Agility + Insight	Wrangle: Your next Melee Attack pulls the target adjacent to you if it's smaller than you, or pull yourself adjacent to it if it's larger than you. If you're the same size, you choose.	Light Reach(3)
Boomerang	Agility + Insight	Return: At the end of the current Phase the Weapon returns to your hand, dealing 1 damage to each unit it passes through on its way back.	One-handed Thrown(8)
Crossbow	Agility + Insight	Piercing Shot: Your attack pierces all enemies in a line, using the same Attack Roll for each target.	Two-handed Ranged(10) Crush(1) Loading(1)
Longbow	Agility + Insight	Twin Arrows: Your next Attack is made against two targets within the weapon's Range, using the same Attack Roll.	Two-handed Ranged(12) Social Distancing
Shortbow	Agility + Insight	Curved Shot: Your next Attack ignores the Cover of a target.	Two-handed Ranged(10) Social Distancing
Sling	Might + Agility	Ricochet: If your Attack hits, it bounces to a secondary target of your choice within half of the weapon's range, dealing 1 damage.	One-handed Ranged(8) Social Distancing
Light Shield		Block: When hit by an attack roll, raise your Damage Thresholds by an amount equal to the Durable tag of this weapon.	Arm Attachment Durable(2)
Medium Shield	Might + Insight	Block: When hit by an attack roll, raise your Damage Thresholds by an amount equal to the Durable tag of this weapon.	Light Durable(3) Sharp(-1)
Heavy Shield	Might + Insight	Block: When hit by an attack roll, raise your Damage Thresholds by an amount equal to the Durable tag of this weapon.	Light Unwieldy(1) Durable(4)

*Active effects modifying an attack must be used before making the Attack Roll.

Weapon Tags

Name	Effect
<i>Arm Attachment</i>	Cannot be used to make attacks, but leaves your hand open. If in the same hand as another Weapon, you lower the die size of both die for all Attack Rolls made with that weapon by 1. If you can't reduce the die size any further you instead halve the die result.
<i>Durable</i>	This weapon has N Max Grit.
<i>Heavy</i>	This tag is used for the purposes of Bulk and abilities, such as retaliations, that use the size/weight of a weapon. A weapon with this tag also gains the Two-handed, Unwieldy(1), and Sharp(1) tags.

Name	Effect
<i>Crush</i>	This weapon does +N damage to Armor, Equipment and Guard.
<i>Light</i>	Can be wielded in the main- or off-hand. The first Attack made with this weapon each Round will not count for RAP.
<i>Loading</i>	The weapon must be loaded by taking an N AP Action in order to Attack with it. Loading while in a hostile creature's Threat triggers an Opportunity Attack from them.
<i>Medium</i>	Standard weapon size
<i>Melee</i>	Has a base attack range of 1.
<i>One-handed</i>	Must be wielded in the main-hand.
<i>Ranged</i>	Can attack at a range of N. For every Space past N the Attack Roll gains -1.
<i>Reach</i>	You may make Melee Attacks targets within N Spaces with this weapon.
<i>Sharp</i>	This weapon's base damage increases by N.
<i>Social Distancing</i>	Attacks made with this weapon while in a hostile creature's Threat are made with Bane(1)
<i>Thrown</i>	Can be thrown to a range of N, landing in the last space before collision. For every Space past N the Attack Roll gains -1.
<i>Two-handed</i>	Must be wielded with two hands.
<i>Unwieldy</i>	Lower the die size of both die for all Weapon Attack Rolls made while this weapon is equipped by N. If you can't reduce the die size any further you instead halve the die result.
<i>Versatile</i>	Can be wielded in the main-hand or with two hands. Wielding the Weapon in two hands grants +1 to Attack Rolls made with it.
<i>Impact</i>	When hitting with this weapon, the attack deals N Knockback

Appendix B: Mutations

Mutations

Additional Eyes

Tier: 1

1d4 additional eyes grow on your body, rolling on the Mutation Location Table (If we implement it) for each

Altered Features

Tier: 1

Roll 1d3: your body either gains, loses or has a visual feature of it altered. Roll 1d6 to decide the feature: [Tail, Eye, Mouth, Ear, Protrusion, Other]. You can decide (or roll for) how many of the feature you get, but they grant no Abilities.

Material Weakness

Tier: 1

You become particularly vulnerable to (Silver, Iron, Nickel, Wood (d4)). Brief contact with the material causes significant discomfort.

Passive: Vulnerability

You can sense when items made of or containing your Vulnerability is nearby. If you carry an item made from your vulnerability for a Shift, or take Damage from an attack with such an item, you lose 1 Grit that cannot be reduced in any way.

No Reflection

Tier: 1

You are no longer reflected in any surface, any non-organic means of seeing you visually also fail (such as cameras, visual spells).

Claws

Tier: 2

Your nails elongate, harden and sharpen to become claws. When you gain this mutation, choose Agility + Insight or Might + Agility for the claws' Roll, and one of Infiltrate, Swift Strike and Dirty Fighting for their Active. Additionally they get the Light tag. This mutation doesn't stop you from wielding items, but you cannot attack with Claws while holding or otherwise using that hand.

Passive: Natural Weapon

You gain a weapon that is always equipped and takes no inventory space. The weapon's Roll, Active and Tags is determined by the Mutation that granted this ability.

Finned

Tier: 2

Your legs and arms develop collapsible rayed fins that can be used to move in the water.

Active: Extend Fins

AP: 1 Focus: 0

You extend or retract your fins. While extended, you can move through water with the same speed you would on land, and suffer no consequences to your physical movement while submerged.

Gremlin

Tier: 2

You become small and scrappy, able to slip through tight spaces and between the legs of foes.

Active: Slip Through

AP: 1 Focus: 2

You move your speed, and as part of this move, can slip through a tight space, or the space of a creature, no matter what countermeasures it has prepared. Additionally, this movement does not provoke reactions.

Passive: Puny

Your Carrying Capacity is reduced by 1, but your Evasion threshold is increased by 1.

Horn(s)

Tier: 2

You grow a horn (beetle, antlers, goat). The horns use the Roll Might + Presence (Since horns are often used as display structures in addition to being weapons) (I am also amenable to allowing Might + Insight since you're using your noggin). Their Active Ability is Can Opener and the Unwieldy and Zero Handed Tags.

Passive: Natural Weapon

You gain a weapon that is always equipped and takes no inventory space. The weapon's Roll, Active and Tags is determined by the Mutation that granted this ability.

Keen Eyes

Tier: 2

Your eyes change (to become catlike, goatlike, wholly black sclera, compound). If you have more than 2 eyes, only one changes in this way

Passive: Superior Vision

[Some ability or other related to sight]

Leaping Legs

Tier: 2

Your legs grow stronger, with a natural gear mechanism that allows tremendous leaps. These legs are very much like those of a grasshopper

Active: Leap

AP: 1 Focus: 1

Choose any point within your Speed and leap there without provoking reactions.

No Eyes

Tier: 2

Your eyes vanish, replaced with smooth skin. Your skin gains the power of sight, and any sight-related mutations you have.

Passive: Skinsight

Your skin is a sensory organ for sight. As long as it isn't covered up, you can see what happens in front of it. This ability also allows you to see things that would normally be Invisible.

Plant Person

Tier: 2

You gain plantlike growths capable of Photosynthesis, and rootlike structures capable of extracting nutrients from the ground. [I wanted to add Mycelial interface to this, but its abilities overlapped with photosynthesis too much.

Passive: Photosynthesis

If you Sleep in direct sunlight, you gain the effects of eating a Ration

Poison Sniffer

Tier: 2

Your nose becomes particularly sensitive to compounds your body considers poisonous

Active: Detect Danger

AP: 1 Focus: 1

You attempt to sense a type of dangerous thing in your vicinity (the type of danger determined by your mutation), you learn whether that danger is within the vicinity, and which squares any such dangers are present in.

Prehensile Tail

Tier: 2

You grow a tail, this tail is agile and under your total control. It is not able to do delicate manipulation on its own, however.

Passive: Lesser Limb

These limbs are only capable of rudimentary manipulation, such as holding objects. If you have multiple Lesser Limbs, they can work in concert to do the work of one equivalent normal hand.

Sentient Stomach

Tier: 2

Your stomach becomes a small creature, capable of crawling out of your esophagus and hunting for food on its own.

Passive: Passive Hunter

While engaged in a different activity, something attempts a Hunting check for you, with Boon(2)

Sleepless

Tier: 2

A change in neurochemistry makes you incapable of sleep, and incapable of needing it. After a few days, you'll develop a permanently wearied-looking appearance

Passive: Unsleeping

You cannot sleep, you gain no penalties for forgoing sleep. If an ability requires you to sleep to be provoked, taking the Relax and Refocus Rest options in the same rest activates those abilities.

Stiff Tail

Tier: 2

You grow a tail, strengthened by bony rods, that greatly improves your ability to balance. It can also be used as a bludgeon, rolling with Might+Agility and the active Push.

Passive: Balanced

Any effect that would knock you prone or otherwise move you against your will, count all successes as 2 lower.

Passive: Natural Weapon

You gain a weapon that is always equipped and takes no inventory space. The weapon's Roll, Active and Tags is determined by the Mutation that granted this ability.

Temporary Unmutation

Tier: 2

You gain the ability to temporarily shapeshift into an unmutated version of yourself.

Active: Return to Self

AP: 2 Focus: 1

You become a version of yourself that is without mutations, you lose access to all of your Mutation Abilities for the duration. This ability lasts for 1 Shift, and can be extended with further Focus use.

Tentacle Limbs

Tier: 2

1d4 Tentacles grow from the same location, if a limb has been chopped off, the remaining stub is where they grow from, these tentacles act as additional limbs, but can only perform delicate manipulation if they all work together.

Passive: Lesser Limb

These limbs are only capable of rudimentary manipulation, such as holding objects. If you have multiple Lesser Limbs, they can work in concert to do the work of one equivalent normal hand.

Untouched by Flame

Tier: 2

A change in your internal chemistry makes it so fire has no hold on you

Passive: Fireproof

You lose no Grit from heat or fire-based sources, you can operate normally in extremely warm temperatures.

Weaponized Tail

Tier: 2

You grow a tail, it might be long or whiplike (Agility+Presence, Reach(3), Wrangle), or end in a wicked weapon like Thagomizer spikes or a club (Might+Presence, Crush(1), Cleave)

Passive: Natural Weapon

You gain a weapon that is always equipped and takes no inventory space. The weapon's Roll, Active and Tags is determined by the Mutation that granted this ability.

Wings

Tier: 2

An additional pair of limbs grows out of your shoulders. They allow you to glide short distances

Active: Glide

AP: 0 Focus: 1

While falling, you spread your wings and catch the air. You now descend at a rate of 3 Squares per round until you land, taking no falling damage, and can Move with your Speed to any point that is not further up than your current elevation.

Rootfeet

Tier: 2

Your feet grow woody spurts that can root you into the ground.

Active: Rooted

AP: 0 Focus: 1

You are rooted into the ground; halting movement from all sources.

Coiled-up

Tier: 3

Your anatomy drastically changes. Your stomach dramatically grows and digests your bones. Your skin becomes almost prehensile, and opens up. This makes it so you have to unfurl yourself and engulf the things you want to eat.

Passive: Murder Blanket

You have no bones, and have to Engulf something to eat it. When not under time pressure, you can squeeze through small holes, opening and crevices.

Active: Engulf

AP: 2 Focus: 1

While grappling a creature, you wrap yourself around them and start digesting. Roll Might + Agility and deal [Successes] damage. The engulfed creature needs to succeed on a Might + Might roll against your Heavy Hit threshold to escape.

Flight Bladder

Tier: 3

You grow an airtight organ similar to a swim bladder, that continually generates a lighter-than-air gas that allows you to ascend into the air. Be careful though! The gas is flammable, so don't rupture it.

Passive: Flammable

Due to the flammability of the Flight Bladder gas, if your hit points are reduced by fire or heat, the gas ignites, immediately dealing 5 damage to you and everyone within 3 squares of you. Additionally, you cannot use the Ascend ability (and lose any altitude you currently had with it) until you have recovered all Grit.

Active: Ascend

AP: 2 Focus: 2

You fill your Flight Bladder with gas and gain enough lift to go up to 100 meters into the air. Ascending 10 squares per round. You can reduce the amount of gas in the bladder to descend, at a rate of 5 squares per AP. This levitation lets you be transported by wind, but you gain no inherent ability to maneuver in the air except up/down.

Mask of Power

Tier: 3

You lose your face. All your Abilities crystallize into a hard mask, anyone who wears this mask gains access to all of your Abilities. You can only use your Abilities while wearing your Mask.

Passive: Faceless

You lose access to the senses of taste and smell, but can still see through photosensitive skin cells and eat by absorbing energy in food through your hands.

Passive: Masked

Whoever wears your mask on their face gains access to your Abilities, and only them.

Minor Shapeshifting

Tier: 3

Your chromatophores grow muscles, allowing them to change their apparent color. Muscles in your skin also allows you to change its texture and create protrusions up to 10 centimeters away from where the skin should be. This ability allows very good camouflage abilities.

Active: Color Change

AP: 1 Focus: 1

You change the way your skin and hair's color appears. This can be in any colors and any patterns. This ability can confer Boon(1) to stealth rolls.

Active: Change Skin

AP: 1 Focus: 1

You change your skin's texture, this can include protrusions up to 10 centimeters. In places where your skin color doesn't matter (such as in lightless environments) this ability can confer Boon(1) to stealth rolls.

On Fire

Tier: 3

You are constantly on fire. Tongues of flame lick along your skin, causing you to glow and incinerates most clothing. Through a miracle of modesty, the fires are always most dense around the privates. The fires are most similar to alcohol fires, low temperature, but still dangerous.

Passive: Burning

You give off Light in a 10-meter radius sphere. If a creature touches you, they lose 1 Grit from fire. If at the end of your turn you are grappling or holding a creature, they lose 1 Grit from fire.

Passive: Fireproof

You lose no Grit from heat or fire-based sources, you can operate normally in extremely warm temperatures.

Prehensile Tendrils

Tier: 3

A profusion of long tendrils grow from your torso, they have an incredible ability to heal, growing back even if cut at the base. You have complete control of these Tendrils

Passive: Lesser Limb

These limbs are only capable of rudimentary manipulation, such as holding objects. If you have multiple Lesser Limbs, they can work in concert to do the work of one equivalent normal hand.

Passive: Regenerative Feature

This Mutation has 2 Grit and the Durable tag, meaning you can interpose it to defend against an attack. When you sleep, all Grit lost by this feature is cleared.

Regenerative Limbs

Tier: 3

You gain the ability to heal quickly, each of your limbs gains the Regenerative Feature ability

Passive: Regenerative Feature

This Mutation has 2 Grit and the Durable tag, meaning you can interpose it to defend against an attack. When you sleep, all Grit lost by this feature is cleared.

Steed

Tier: 3

You become capable of crossing the landscape quicker as your legs and endurance increase. Additionally, your physiology subtly shifts in a way that allows another humanoid character to ride you as if you were a mount.

Passive: Fast Traveler

Reduce the amount of shifts you would require to traverse a hex by 1 (to a minimum of 1)

Passive: Rideable

Another humanoid character can treat you as their steed without incurring penalties for you.

Passive: Heavy Hauler

Your Carrying Capacity increases by 4

Titanic Attribute

Tier: 4

Your (Might, Agility, Insight, Presence (1d4)) becomes empowered. You might even attain equivalent ability to that of a Titan!

Passive: Empowered Attribute

Your Attribute modifier for an Attribute is permanently increased by 1, as is the maximum for that attribute, such that you could attain a d20 in it.
